

AI Clinical Research

NEWSLETTER

Welcome to the **March** edition of AICR's Newsletter, where we bring you the latest updates and advancements from our company.

As we strive to push the boundaries of medical innovation, we are excited to share with you some of the research initiatives achieved by our dedicated team.

News

- Ongoing studies
- Future plans

Ongoing Studies

In two different therapeutic areas: Covid-19 and Schizophrenia

We continued our site management and monitoring activities, effectively assisting both our investigators and patients.

Future Phase II-IV studies

In the following therapeutic areas:

- Acne
- Atopic Dermatitis
- Grass Pollen Allergy
- Iron Deficiency Anemia
- Glaucoma
- Medical device (Thermometer)

Future Bioequivalence studies

- Monoclonal antibody

Future Phase I studies

In the following therapeutic areas:

- Schizophrenia
- Neutropenia in Cytotoxic chemotherapy subjects
- Ovarian Cancer
- Venous leg ulcers
- Non-Hodgkin Lymphoma

Thank you for your continued support and collaboration. We look forward to sharing more exciting updates and insights with you in the months ahead.
